Distribution System:

Water Quality:

North Beach Water District collected and submitted five (5) compliance coliform bacteria water samples in April, 2013. All water samples tested negative for coliform bacteria presence.

The District received 2 water quality calls in April, 2013.

Old Business:

Washington State Auditor

The exit interview was held at 10:00 a.m. Friday May 17, 2013. The Exit interview was held at the Districts business office in Ocean Park.

BIAS Software Implementation

The implementation is on time and progressing steadily. Jack has been entering data from January, February, March and April into the software. That is a slow and tedious process. The vouchers for Pacific County are now being generated by the BIAS Software.

The implementation is on track to generate our first billing in June, 2013.

Water Main Improvements

The sample stations arrived in April. The crew has been priming and painting the stations preparing them for installation.

Wiegardt Property Purchase:

Nothing new to report.

DWSRF Loans:

Gray and Osborne completed the SEPA check list in April for both the Water Main Project and the Supply and Treatment Project. The Board of Commissioners adopted SEPA procedures by Resolution 23-2009. The District's general manager, acting as the District's responsible official, issued a determination of nonsignificance (DNS) for both the Water Main Project and the Supply and Treatment Project. The general manager advertised and posted a notice of determination of nonsignificance in accordance with Resolution 23-2009. The fourteen day comment period will end on May 22, 2013

At this rate the cultural review should be complete in early June, 2013.

Safety Meeting Minutes:

North Beach Water District staff had their monthly Safety meeting on the first Monday of the month.

Surfside Water System:
