Fri.	5/31/13	Brian	Mowed the NWF and SWF.	RT

Picture of the iron inside the Mozzi. The Mozzi is what creates a vacuum so we can release ozone into our water.

Another Picture of the Mozzi , this time you can compare the difference between the old parts and the new parts

Picture of where the Mozzi is usually located.

Picture with the Mozzi now in place.

Picture of before we cleaned up and organized the stuff at the SWF.

Picture of after we cleaned up and organized the stuff at the SWF.

Before

After

Meter box on the right is one of the new services we installed.

Another picture up close of the new service we installed.

Picture of the valve slabs touched up.

Another valve slab after the lids was repainted.
