## General Manager Report May, 2018

To:  
Board of  
Commissioners

From:  
William Neal,  
General Manager

### City of Long Beach Future Service Area:

David Glasson contacted me concerning a revision to their Water System Plan. The City would like to expand their future service area to include area that is currently included in North Beach Water District's future service area.

I have included a map from the City. Currently, everything north of Cranberry Road is in the District's future service area.

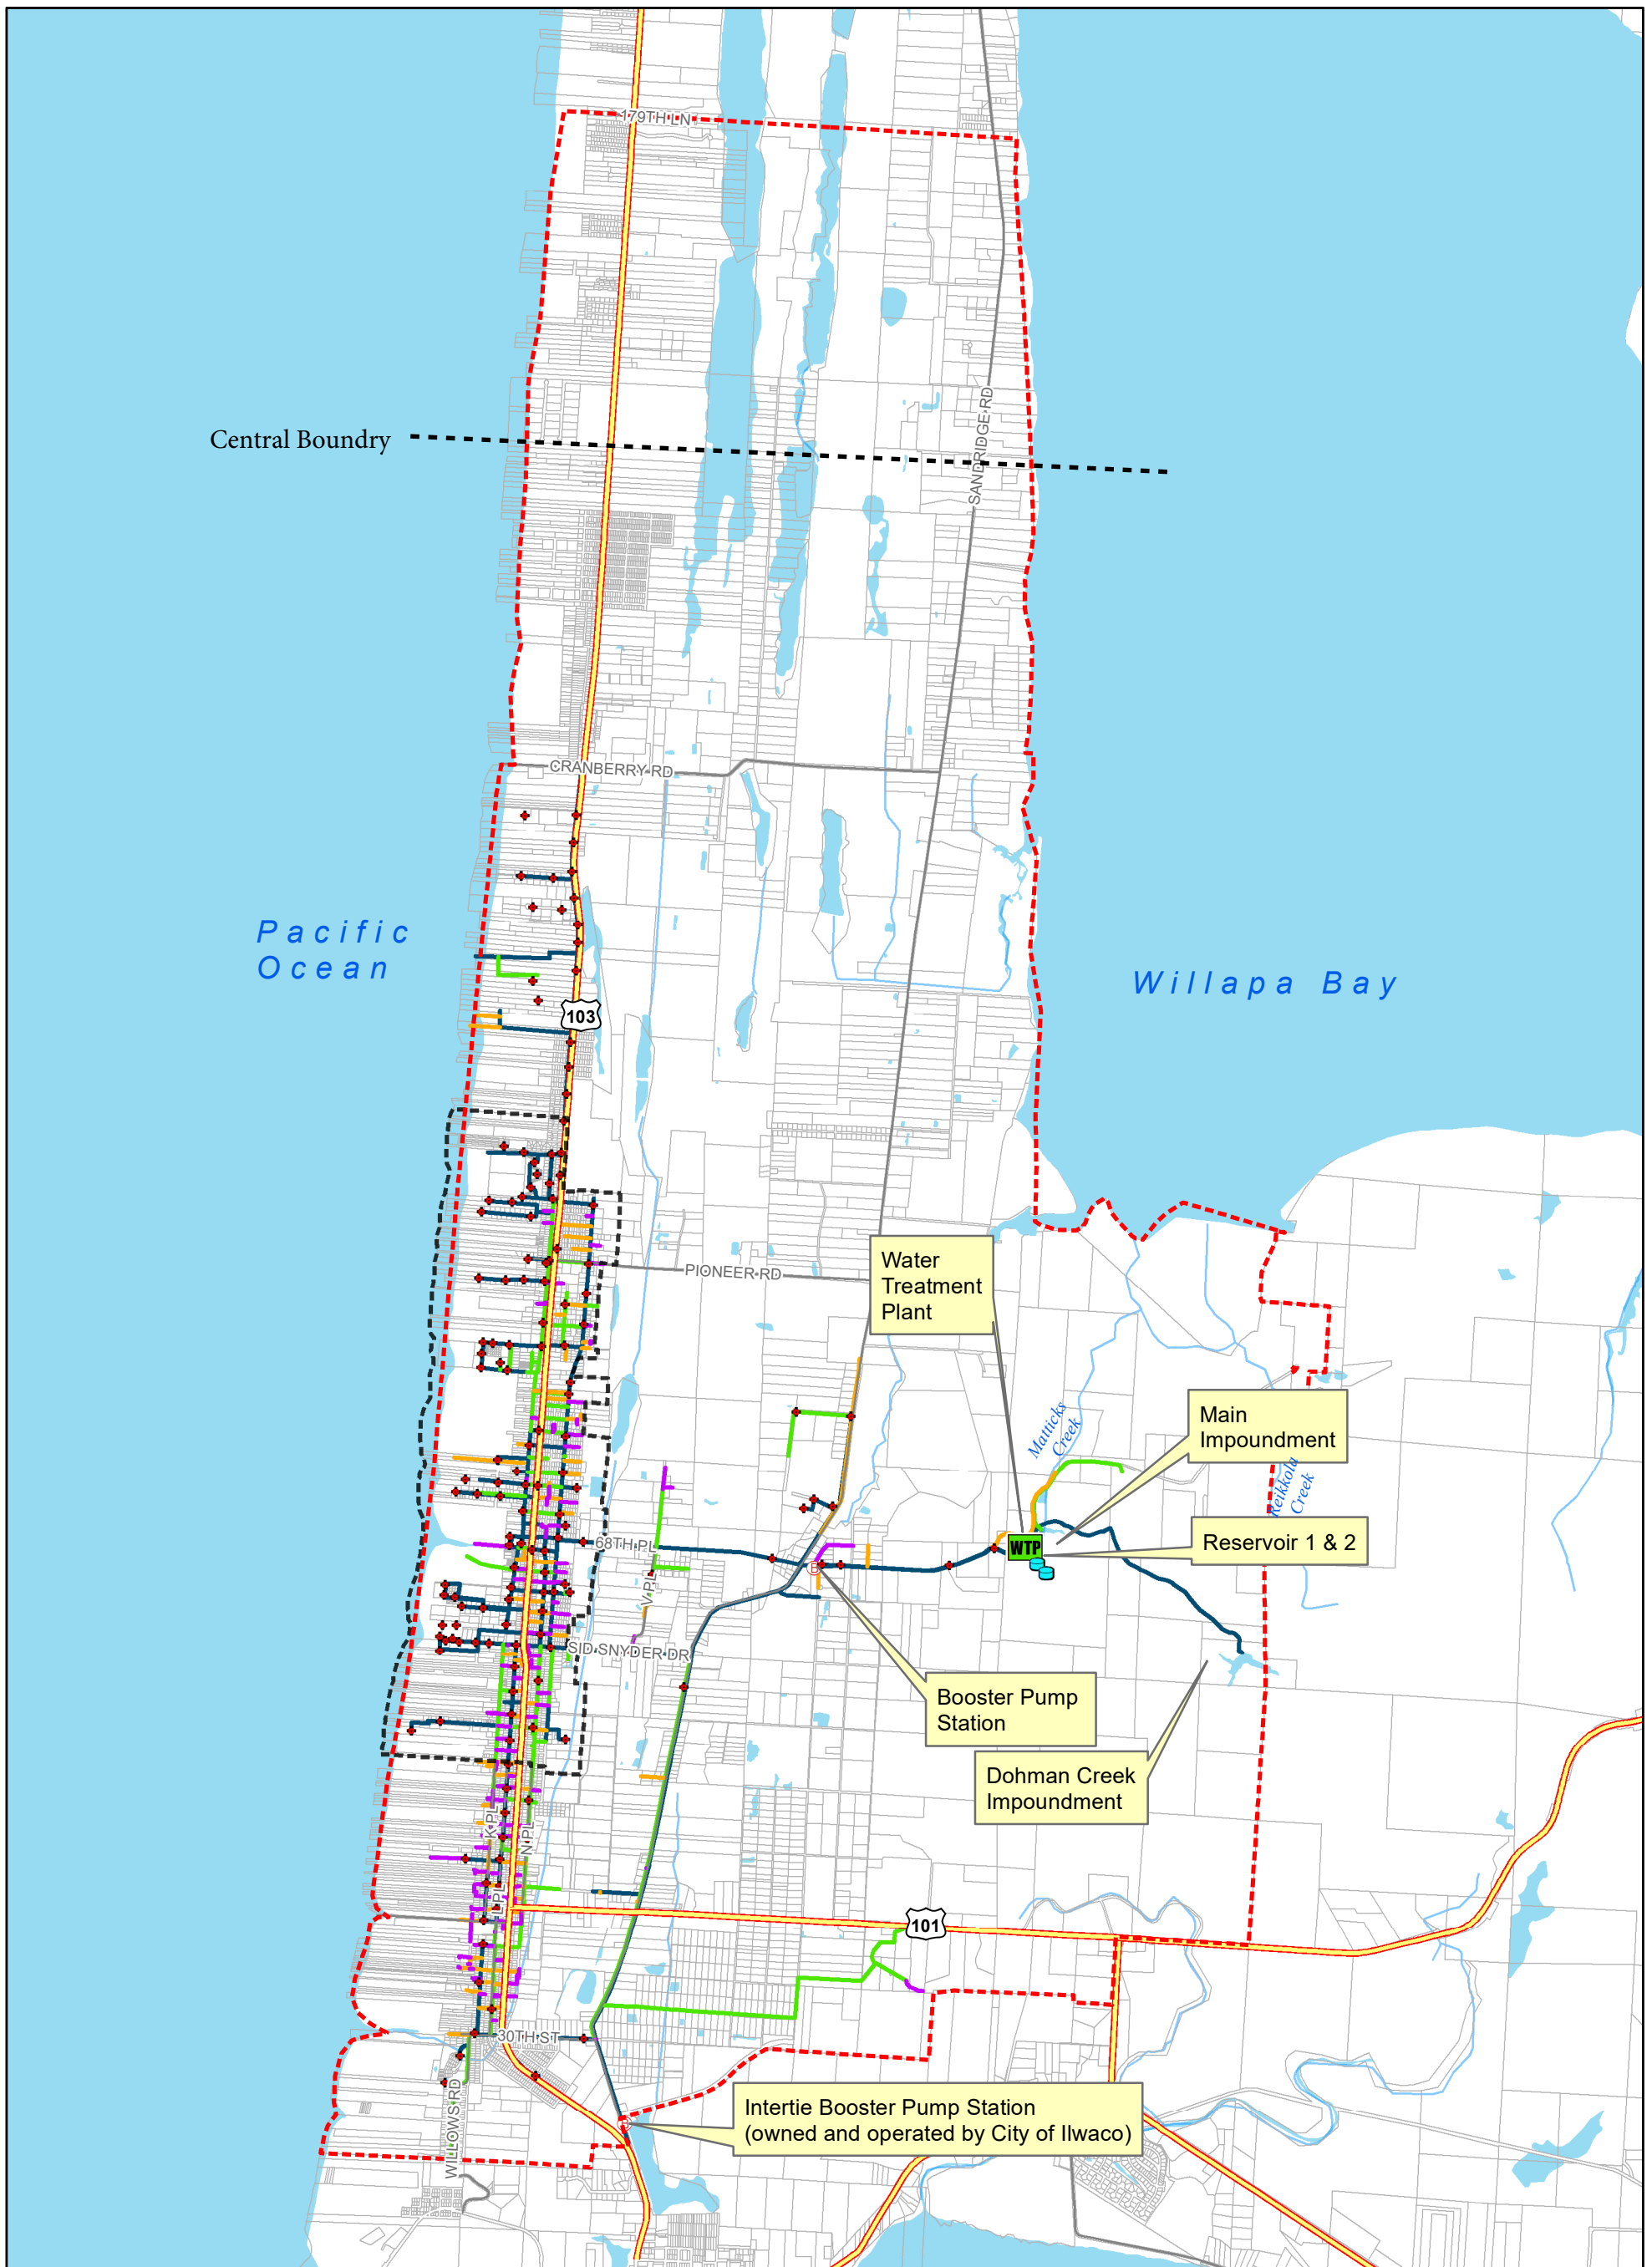

Although I do not have a problem with this request I am concerned about the placement of their northern border.

The City's water main ends just south of Cranberry Road. The District's water main ends just north of 179<sup>th</sup> Lane. It would be much more reasonable to place the boundary about halfway between the District's and the City's water mains.

## North Beach Water District
