

# NORTH BEACH WATER 2013 FLUSHING SCHEDULE

Listed below you will find the 2013 Flushing Schedule for the District. It is the goal of the Crew to maintain this schedule as closely as possible; however there may be unforeseen occurrences that could alter the timeframe. This information will be posted at the Utility Business Office, Ocean Park Post Office and in the Chinook Observer. There will be cautionary flushing flags on the main roads of each area on the day of the flushing. The 2013 flushing will be DAY TIME hours.

It is our goal to significantly reduce the mineral sediment deposits within the main lines first starting with the larger lines (12") and following up with the smaller lines. The discolored water is NOT harmful to the health of you or your animals but may stain your laundry items. If you still have 'dirty water' the day after your area's flushing, please phone the office.

## **AREA 1**

**Monday March 11, 2013**

**AREA 15****Wednesday April 3, 2013**

Other Rushlight properties not mentioned above

Returning to a scheduled flushing program will help eliminate the possibility of dirty water instances that plagues us all during peak seasonal usage.

Your patience with the crew and staff during the flushing is appreciated.
