General Manager Report February, 2018

03.7.2018

To:
Board of
Commissioners

From: William Neal, General Manager

DWSRF Project Status:

The DWSRF Project has restarted. The crew is working on the mechanical improvements to the NWF Treatment Plant. The contractor has started electrical work in the Booster Station.

The PUD is contracted to install the 480 volt transformer. The transformer should be installed soon, depending on PUD scheduling.

All of the well houses have been demolished. The contractor will be installing the new pumps in the wells in early April. There is a lot to do in a short period of time. It is our goal to have the North Wellfield up and running before Memorial Day Weekend.

I hired with DPR Developers to assist with ditching and backfill and making revisions to the reservoirs. Several of our crew were down with the flu and we needed to complete the work so that the electricians could run their conduit.

The mechanical work in the North Well Field Treatment Plant is nearing completion. Our crew has done a fine job assembling the pipes and fittings. I hired Jeff Early to form and pour concrete housekeeping pads and pipe supports. Jeff will also be repairing the wall where the well piping enters the building.

Despite setbacks from the flu and other delays the work is progressing nicely. I anticipate we will be online by the second week May.
